

Appl. No. 09/547,663
Amdt. dated November 22, 2005
Preliminary amendment after RCE

In the claims:

Claims 1 and 17 are amended herein. Claims 4, 7-16 and 19 are canceled. The remaining claims are not amended in this response.

1. (currently amended) A color hologram display comprising a reflection and volume hologram of a single layer photosensitive material, wherein a color pattern of plane characters or images and a color three-dimensional subject image are reconstructably recorded therein while a reconstructed image of the plane pattern and its plane shadow differs depending on observation height from the hologram surface,

wherein a plane shadow of said color pattern of plane characters or images is ~~reconstructed at a surface or image plane~~ holographically recorded in the photo sensitive material such that the reconstructed image plane of the plane shadow is different from the reconstruction image plane of the reconstructed color pattern.

2. (previously presented) The color hologram display according to claim 1, wherein said color pattern of plane characters or images is reconstructably recorded in monochrome.

Appl. No. 09/547,663
Amdt. dated November 22, 2005
Preliminary amendment after RCE

3. (previously presented) The color hologram display according to claim 2, wherein said color pattern of plane characters or images is reconstructably recorded in green.

4. (canceled)

5. (previously presented) The color hologram display according to claim 1, wherein said shadow is reconstructably recorded in a complementary color to a color of said color pattern.

6. (previously presented) The color hologram display according to claim 1, wherein said shadow is reconstructably recorded in front of said color pattern.

7-16. (canceled)

17. (currently amended) A color hologram display according to one of claims 1 to 3, wherein a said plane shadow of said color pattern of plane characters or images is ~~reconstructably~~ recorded to be reconstructed on the surface of a the color three-dimensional subject image.

18. (previously presented) The color hologram display according to claim 5, wherein said shadow is reconstructably recorded in front of said color pattern.

19. (canceled)
